## **AREAS OF SPECIALIZATION**

---

**Academic Register Learning, Language Minoritized Learners, Second Language Acquisition, Educational Linguistics, Adolescent Literacy, Reading and Writing Development**

Inspired by my experience as a middle grade educator, my scholarship investigates the development of academic register (AR) skills, or the specialized language that remains paramount for reading, writing, and conceptual learning in the classroom and serves as a crucial tool for advocacy and societal engagement outside of it. By examining the role of academic register skills in reading comprehension and writing for middle grade students my research aims to provide educators with the insights needed to design instruction that supports all students to participate in classroom communities of readers, writers, and thinkers. By making visible the language demands of schooling, my mixed-methods program of research aims to advance a theory of school-language learning that can inform and transform pedagogical approaches that support students who have been traditionally ill-served in U.S. schools, including Emergent Bilinguals (EBs) and other language minoritized youth. I am also an engaged scholar, frequently partnering with educators, schools, and large urban districts to create systemic changes that ensure equitable access to literacy learning.

### CURRENT FUNDING

4. **Development and Innovations of the TRANSLATE (Teaching Reading And New Strategic Language Approaches to Emergent bilinguals) Curriculum.**

Institute of Education Sciences (IES), \$1,998,656.00, R305A240185

Period of Performance: 7/1/2024-6/30/2028

Role: PI, Co-PIs: Amanda Goodwin, Vanderbilt University; Mikel Cole, University of Houston; Margaret Troyer, SERP Institute.

***Purpose:*** To support the reading comprehension development of Multilingual learners (MLs)—a group that has grown by 80 percent in the last two decades—the research team will close gaps in literacy learning opportunities for middle grade MLs (grades 4-6) by iteratively developing and piloting a curricular approach, which we call Project TRANSLATE [Teaching Reading And New Strategic Language Approaches To English-learners]. The TRANSLATE curriculum currently exists as a 22-week supplemental program; this project would seek to expand these materials into a year-long English language arts curriculum (41-weeks), inclusive of a set of modular units that can be configured to best support MLs, who represent a particularly heterogeneous population in terms of English language development levels and reading comprehension skills. Our proposed project will progress in two stages: an iterative design phase in partnership with middle grade educators that will refine and expand the existing curriculum so that it spans one academic year (study years 1, AY 2024-2025, & 2, AY 2025-2026) and a quasi-experimental pilot study of the expanded curriculum (study year 3, AY 2026-2027) in two school districts.

3. **Exploring the Impact of Education in New Versus Established Immigrant Destination U.S. States on Multilingual Learners' (MLLs') Reading Achievement During Middle Childhood.**

American Educational Research Association (AERA) - National Science Foundation (NSF), \$35,000.

Period of Performance: 1/15/2022– 5/31/2025

Role: PI

***Purpose:*** Studies are needed that consider the conditions in which MLL students educated in 'new immigrant destination' (NID) states currently learn

and live, conditions which differ in important ways from the social, demographic, economic, political, and educational circumstances shaping the literacy learning experiences of MLLs in other regions. This empirical study aims to document whether MLLs' levels of reading achievement in NID states show parity with those of students educated in regions where multilingual learners have traditionally been present in the school population. Such research is essential to understand whether insights into MLL populations' reading achievement generated from decades of studies in long-serving immigrant destinations can be generalized to MLL populations educated in NID states, and further whether policies informed by this research remain applicable.

2. **Examining Experience with the Language of Print and Cognitive Factors as Predictors of Grammatical Development.**

National Institute of Health (NIH), \$2,995,847 (additional NIH supplement awarded: \$212,715.92)

Period of Performance: 1/1/2020 – 12/31/2024

Role: Co-PI; PI: Duane Watson, Vanderbilt University; Co-PI: Tessa Warren, University of Pittsburgh.

***Purpose:*** This study focuses on middle grade readers and tests two mechanisms by which individual differences in language experience might influence grammatical processing when reading: 1) experience with diverse and complex texts, enabling the construction of a better statistical model of the linguistic input and/or 2) gains in processing efficiencies through the amount of text exposure. Rather than explore language experience as a broad construct, we examine an understudied facet of language experience: the quantity and quality of digital and print text exposure experienced by readers inside- and outside-of-the-classroom. Results will inform a deeper understanding of mechanisms that might support later language learning as a core component of text comprehension.

1. **Core Analytical Language Skills Instrument: Refining the assessment to measure and monitor English Learners' progress.**

Institute of Educational Sciences (IES), \$1,398,956.

Period of Performance: 7/1/2019 – 06/30/2025

Role: Co-PI; PI: Paola Uccelli, Harvard University; Co-PIs: Jeremy Miciak, University of Houston & Chris Barr, Rice University.

***Purpose:*** This project conducted in partnership with multiple school districts aims to create an efficient and educationally relevant measure of English

academic register skills for use with multilingual learners. Because the measure taps knowledge of language features commonly found in school texts, the results of this assessment are designed to inform linguistically supportive reading comprehension instruction. We are working on collaboration with educators in our partner districts design routines for linking these assessment results to instruction that will be made available at the conclusion of the study.

#### COMPLETED FUNDING

8. **An Expanded Efficacy Study of the TRANSLATE (Teaching Reading And New Strategic Language Approaches To Emergent bilinguals) Intervention.** Scaling Success Grant Competition, Vanderbilt University, \$60,000.  
Period of Performance 10/1/2022-5/30/2024  
Role: PI

*Purpose:* This grant funded an expansion of the number of participants in our efficacy study described below, resulting in a fully powered evaluation of the TRANSLATE curriculum's impacts on middle graders text comprehension.

7. **A Researcher-Practitioner-Community Partnership to Foster Early Childhood Language Development in Multilingual Populations.**  
Internal Grant provided by Peabody College, Vanderbilt University, \$9,120.  
Period of Performance 06/1/2022-5/31/2024  
Role: PI; Co-PI: Ana Christina da Silva Iddings, Vanderbilt University.

*Purpose:* This grant provided funding to expand on the current relationships being developed with teachers of students who are supporting language development for young English Language Learners. Apart from the development and strengthening of relationships in our local schools, this project will result in the design of language and literacy curricular activities that center the identities and voices of children in the classroom which will be co-designed with early childhood teachers, families, and community members in the Latine community.

6. **Advancing Teacher Education for Linguistically and Culturally Diverse Classrooms in Turkey**  
U.S. Mission Turkey Grants Program, \$46,218.  
Period of Performance 11/1/2022-4/30/2024  
Role: PI, Co-PIs: Basak Cermikli Ayvaz, Vanderbilt University; Irem Çomoglu & Eda Akgün Özpolat, Dokuz Eylül University, Izmir, Turkey.

**Purpose:** This design-based study is a partnership with Dokuz Eylul University to support pre-service educators of English in Turkey to develop the skills and dispositions needed to teach multilingual and refugee youth.

5. **A researcher-practitioner partnership to advance academic language instruction for linguistically diverse populations.**

Peabody Researcher-Practitioner Partnership Grant, Vanderbilt University, \$15,000.

Period of Performance: AY 2018-2023

Role: PI

**Purpose:** This project aimed to form an enduring partnership with middle grade educators to co-investigate the role of language in text comprehension and production and to apply this knowledge to instruction. The resulting professional learning community has continued for five years.

4. **An Efficacy Study of the TRANSLATE (Teaching Reading And New Strategic Language Approaches To Emergent bilinguals) Intervention.**

Lyle Spencer Research Award, Spencer Foundation, \$929,000.

Period of Performance 1/1/2019-12/31/2023

Role: PI, 2022-2023; Co-PI, 2019-2022; Co-PIs: Robert Jiménez, Vanderbilt University; Amanda Goodwin, Vanderbilt University; Samuel David, University of Minnesota; Mikel Cole, University of Houston; Mark Pacheco, University of Florida.

**Purpose:** This multi-year, design-based research and curricular efficacy study resulted in what we believe to be the first translanguaging curriculum designed for widespread use with middle grade learners (grades 4-8). Collaborating with a team of educators across two school years and through multiple rounds of refinement, we designed a 22-week English language arts curriculum that leverages the linguistic resources of multilingual youth, scaffolds educators in applying translingual and metalinguistic pedagogies, and cultivates positive multilingual identities among students. We conducted an efficacy trial of the curriculum in 24 middle grade classrooms (AY 2021-2023) and refined the professional learning sequence to facilitate broad implementation. Upon study completion, TRANSLATE materials were made available at no cost at [www.translatetoread.com](http://www.translatetoread.com). To date, the materials have been downloaded over 1,000 times.

3. **The language of written argumentation and explanation: Individual developmental trajectories from 4<sup>th</sup> to 8<sup>th</sup> grade.**

Institute of Education Sciences (IES), \$595,798.

Period of Performance: 7/1/2017 - 6/30/2019

Role: Co-PI; PI: Paola Uccelli, Harvard University; Co-PI: Chris Barr, Rice University.

***Purpose:*** Using a cohort-sequential longitudinal design to follow students from 4<sup>th</sup> to 8<sup>th</sup> grade (n=733), this project was guided by two main objectives: to examine individual growth trajectories of language skills for academic writing in students' writing-to-explain (W2E) and writing-to-persuade (W2P) tasks; to explore the concurrent development of productive Language for Academic Writing Skills (L4W), receptive Core Language for Academic Reading Skills (L4R), and Writing Quality (WQ) over time. Results revealed considerable individual variability and consistent links between receptive language and productive language skills.

2. **Exploring the Role of Metalinguistic Instruction in Middle Grade Classrooms.**

Equity Diversity and Innovation Seed Research Grant, Vanderbilt University, \$7,500.

Period of Performance: AY 2018-2019

Role: PI; Partners: Metro Nashville Public Schools, New York City Public Schools.

***Purpose:*** This grant fostered a researcher-practitioner partnership with middle grade educators in two large urban districts to support their use of student language data to inform the design of instruction. Specifically, the project aimed to increase the number of metalinguistic scaffolds provided in lessons to multilingual learners to give greater access to text.

1. **Expert academic identity formation in informal learning spaces: Exploring the role of language and participatory structures.**

Period of Performance: AY 2016-2018

Peabody College Small Research Grant, Vanderbilt University, \$7,590.

Role: PI; Co-PIs: Tesha Sengupta-Irving, Vanderbilt University; Corey Brady, Vanderbilt University.

***Purpose:*** This study sought to examine how mentors within a makerspace fostered youth engagement and participation in a range of making practices.
